

Yogesh Dattatray Morey

Snowflake Data Engineer | AWS Certified Solutions Architect | DBT Cloud | Azure

Nagpur, Maharashtra 440015, India | ymorey15@gmail.com | +91 7350956885

Portfolio: yogesh01-01.github.io/yogesh-morey-portfolio | LinkedIn: linkedin.com/in/yogesh-morey-735b7334b

1. PROFESSIONAL SUMMARY

Results-driven Data Engineer with 3.6+ years of experience designing and building scalable cloud data solutions using Snowflake, AWS, and Azure. Specialized in Snowflake data warehousing with deep expertise in Snowpipe, Streams & Tasks, DBT Cloud, and ELT pipeline development. Proficient in AWS services (S3, Glue, Lambda, Redshift) and Azure data stack (Azure Data Factory, Azure Data Lake, Synapse Analytics, Databricks). AWS Certified Solutions Architect with hands-on experience delivering enterprise-grade analytics platforms across banking and industrial domains.

2. CORE COMPETENCIES & TECHNICAL SKILLS

❄️ Snowflake (Primary Expertise)

- Snowflake Architecture: Virtual Warehouses, Multi-Cluster Warehouses, Time Travel, Zero-Copy Cloning, Fail-Safe
- Data Loading & Ingestion: Snowpipe, Bulk Loading (COPY INTO), Staged Files, External Stages (S3, Azure Blob)
- Automation: Streams, Tasks, Dynamic Tables, Stored Procedures
- Objects: Tables, Views, Materialized Views, Sequences, File Formats
- Performance: Query Optimization, Clustering Keys, Result Caching, Warehouse Tuning
- Security: Role-Based Access Control (RBAC), Row-Level Security, Column-Level Security, Data Masking
- Data Sharing: Secure Data Sharing, Reader Accounts, Marketplace
- Data Modeling: Star Schema, Snowflake Schema, Medallion Architecture (Bronze/Silver/Gold)

⚙️ Data Transformation & Modeling

- DBT Cloud: Model Development (Staging, Intermediate, Marts), Incremental Models, Sources, Tests, Documentation
- Advanced SQL, SnowSQL, T-SQL (SQL Server)
- Data Architecture: Medallion Architecture, Star Schema, Snowflake Schema, Slowly Changing Dimensions (SCD)

☁️ AWS Data Engineering

- Core Services: S3, EC2, IAM, VPC, CloudWatch
- ETL & Orchestration: AWS Glue (PySpark), AWS Lambda
- Data Warehousing: Amazon Redshift (basics), Redshift Spectrum
- Streaming & Messaging: SQS, SNS
- Integration: S3 Event Notifications → Snowpipe, S3 as External Stage for Snowflake

🔹 Azure Data Engineering

- Data Integration: Azure Data Factory (ADF) — Pipelines, Datasets, Linked Services, Triggers
- Storage: Azure Blob Storage
- Streaming: Azure Event Hubs, Azure Stream Analytics
- Security & Governance: Azure Active Directory (AAD), Azure Key Vault, Managed Identities
- Integration with Snowflake: ADLS Gen2 as External Stage, ADF to load data into Snowflake

💻 Programming

- SQL
- Python (Basic)

🔧 Databases & Tools

- Databases: Snowflake, SQL Server, MySQL
- Version Control: GitHub, Git
- Project Management: Jira, ServiceNow, Agile / Scrum
- Monitoring: CloudWatch, Azure Monitor, Snowflake Query Profiler

3. PROFESSIONAL EXPERIENCE

Snowflake Developer | Tata Consultancy Services Feb 2022 – Aug 2025

Project: Honeywell (USA) Aug 2024 – Aug 2025

- Designed and implemented cloud-based data pipelines using Snowflake and AWS to process large-scale industrial IoT data.
- Built modular DBT models (staging, intermediate, marts) to transform raw operational data into analytics-ready datasets.
- Implemented Snowflake Streams and Tasks for automated, near-real-time data ingestion, reducing manual operations by 80%.
- Optimized Snowflake query performance through clustering keys, warehouse tuning, and result cache strategies.
- Integrated Snowflake with AWS S3 using Snowpipe for continuous, automated data loading from event-driven S3 notifications.

Project: Webster Bank (USA) Feb 2022 – Jul 2024

- Designed and implemented automated ELT pipelines using Snowpipe, Streams, and Tasks for efficient near-real-time banking transaction ingestion.
- Created and managed Snowflake objects including tables, views, materialized views, and zero-copy clones for development/testing environments.
- Implemented data modeling using Star Schema and Snowflake Schema for financial reporting and analytics solutions.
- Integrated Snowflake with AWS S3 for secure data ingestion and data unloading; configured IAM roles and storage integrations.
- Collaborated with cross-functional teams in Agile environments using Jira to deliver data engineering solutions on schedule.

Key Achievements

- Automated end-to-end data ingestion pipelines using Snowflake Streams & Tasks, reducing manual operations by 80% and improving data processing efficiency.
- Improved Snowflake query performance through SQL optimization and warehouse configuration, delivering measurably faster reporting.
- Enabled near real-time analytics across banking transaction data by implementing Snowpipe-based automated ingestion pipelines.

4. CERTIFICATIONS

- ☒ AWS Certified Solutions Architect – Associate
- ☐ Microsoft Certified: Azure Data Engineer Associate (DP-203) — In Progress
- ☐ Snowflake SnowPro Core Certification — Planned

5. EDUCATION

Bachelor of Engineering — Computer Science Sant Gadge Baba Amravati University, Maharashtra

6. LANGUAGES

English | Hindi | Marathi
